

Website Development, Launch & Support Agreement

A written record of the final Manoir Kits project, payment, maintenance, and launch-support terms.

PROJECT FEE

\$8,000

\$4,000 paid in August 2026 and \$4,000 paid in September 2026.

FUTURE-WORK BANK

\$3,000

24 prepaid hours at \$125 per hour for later fixes, changes, and development.

BUG-FIX GRACE

20 hours

Separate from the paid bank and available only during the 30 days after launch.

TOTAL COMMITMENT

\$11,000

The \$8,000 project fee plus the \$3,000 future-work service bank.

PARTIES AND EFFECTIVE DATE

AGREEMENT EFFECTIVE DATE

CLIENT LEGAL NAME / ENTITY

CLIENT SIGNATORY NAME

CLIENT SIGNATORY TITLE

CLIENT EMAIL

GOVERNING STATE

Developer: Ashwin Chembu. Client: the legal person or entity identified above doing business as Manoir Kits, if applicable. Blank fields must be completed before signature.

Scope and payment

The project fee covers the agreed website work through official launch. The service bank covers later work.

1

PROJECT SCOPE

Developer has designed, developed, tested, documented, and deployed the custom Manoir Kits commerce experience. The project includes the custom storefront, interactive 3D jacket builder, Shopify product and checkout setup, private and administrator access systems, order and customer workflows, deployment configuration, testing, launch preparation, and reasonable revisions within the existing agreed scope.

The parties acknowledge that substantial work was completed before this Agreement. This Agreement records the final commercial terms for that completed work, remaining launch tasks, the post-launch bug window, and future support.

2

PROJECT FEE - \$8,000

Client will pay Developer a fixed project fee of \$8,000 for work from project start through official launch, according to the schedule below. The payment dates should be completed before signature.

August 2026

First project payment

PAYMENT DUE DATE

\$4,000

September 2026

Second project payment

PAYMENT DUE DATE

\$4,000

3

FUTURE-WORK SERVICE BANK - \$3,000

- Client will fund a \$3,000 service bank equal to 24 hours at \$125 per hour.
- The bank is for future fixes, changes, enhancements, maintenance, troubleshooting, and related development outside the 30-day bug-fix grace period.
- Hours are deducted using actual time logged in quarter-hour increments. Automated deployment estimates are informational and do not deduct hours.
- Unused hours remain available until used unless the parties agree in writing to a different treatment.
- Developer will not perform billable work beyond the 24-hour bank without Client's written approval at the agreed \$125 hourly rate or a later written rate.

Launch grace period and work tracking

Bug remediation is separated from the paid service bank so both balances remain clear and auditable.

4

OFFICIAL LAUNCH AND 30-DAY GRACE PERIOD

The bug-fix grace period begins on the Official Launch Date entered below and ends at the earlier of: (a) 30 consecutive calendar days after that date, or (b) 20 total grace-period hours. Grace-period hours do not reduce the 24-hour future-work service bank.

OFFICIAL LAUNCH DATE

A grace-period bug is a reproducible failure of an agreed feature to perform substantially as documented or demonstrated at launch. New features, new design directions, content or inventory entry, third-party platform changes, changes to Client requirements, user error, and issues caused by credentials, external services, or unauthorized code changes are not grace-period bugs. Those items may be charged to the service bank with approval.

5

ADMIN TRACKER AND LOGGING

- Every push to the main production branch is automatically logged with its commit, author, timestamp, changed files, line totals, and an initial engineering-effort estimate.
- Automatic estimates remain unreviewed and do not reduce either balance. A reviewed entry records the actual applied hours and classifies the work as grace-period, future-work bank, or non-billable.
- Manual work that does not correspond to a code push may be entered separately with a description, date, estimate, actual hours, and allocation.
- Voided or corrected entries remain visible in the audit history with the reason, editor, and time of the change.
- Client may review the owner dashboard and raise a good-faith question about an entry within seven business days after it is posted. The parties will promptly reconcile any disputed entry.

6

SCHEDULING AND REQUESTS

Client will provide requests, content, approvals, account access, and decisions reasonably needed for the work. Developer will communicate expected timing for material requests. No specific turnaround or availability is guaranteed unless the parties confirm it in writing. Work may be paused while an invoice is overdue or required access is unavailable.

Ownership, confidentiality, and legal terms

These provisions keep project ownership, third-party services, and future changes clear for both parties.

7

OWNERSHIP AND PORTFOLIO RIGHTS

After Client pays the full \$8,000 project fee, Client owns the final custom website deliverables created specifically for Manoir Kits, excluding Developer's pre-existing tools, reusable methods, general know-how, open-source software, third-party software, platform services, fonts, stock materials, and other licensed components. Developer grants Client the rights reasonably necessary to use incorporated Developer materials as part of the delivered website. Developer may identify Manoir Kits and display non-confidential public work in a portfolio unless Client objects in writing.

8

CONFIDENTIALITY AND CREDENTIALS

Each party will use reasonable care to protect non-public business, customer, pricing, technical, and account information received from the other party. Credentials will be shared only through approved secure methods. This duty does not cover information that is public through no breach, independently developed, lawfully received from another source, or required to be disclosed by law.

9

THIRD-PARTY SERVICES AND WARRANTY

Shopify, Firebase, Render, domain providers, payment processors, APIs, browsers, and other third-party services remain subject to their own terms, availability, pricing, and technical limits. Developer is not responsible for third-party outages or policy changes. Developer will perform services in a professional and workmanlike manner but does not guarantee sales, revenue, product-market fit, uninterrupted operation, or a particular business result.

10

LIABILITY AND TERMINATION

To the maximum extent permitted by law, neither party is liable to the other for indirect, incidental, special, or consequential damages arising from this Agreement. Developer's aggregate liability arising from the services will not exceed the fees actually paid to Developer under this Agreement, except where a limitation is prohibited by law. Either party may end future services by written notice. Amounts earned for completed work remain due, and unused service-bank hours remain available unless the parties agree in writing to another resolution.

11

INDEPENDENT CONTRACTOR AND COMPLETE AGREEMENT

Developer is an independent contractor, not an employee, partner, or agent of Client. This Agreement and any signed written amendment are the complete agreement on this subject and replace prior pricing discussions or proposals. A waiver or change must be in writing and agreed by both parties. If any provision is unenforceable, the remaining provisions continue. The Agreement is governed by the law of the state entered on Page 1, without regard to conflict-of-law rules.

Acceptance and signatures

By signing, each party confirms that it has read, understood, and agrees to the terms on all five pages.

12

ELECTRONIC SIGNATURES AND COUNTERPARTS

The parties consent to transact electronically. Typed, drawn, or platform-applied signatures and signed electronic copies have the same effect as originals. Counterparts together form one agreement.
