firebase billing simple setup guide

why	turns on the website feedback form
cost	no monthly fee pay as you go
free	first 10000 security checks each month
after	8 dollars total from 10001 to 100000 checks

you need

a card | billing address | about 5 minutes

start here

open a new browser tab and go to

<https://console.firebase.google.com>

pricing checked july 2026 | firebase and google cloud official pricing

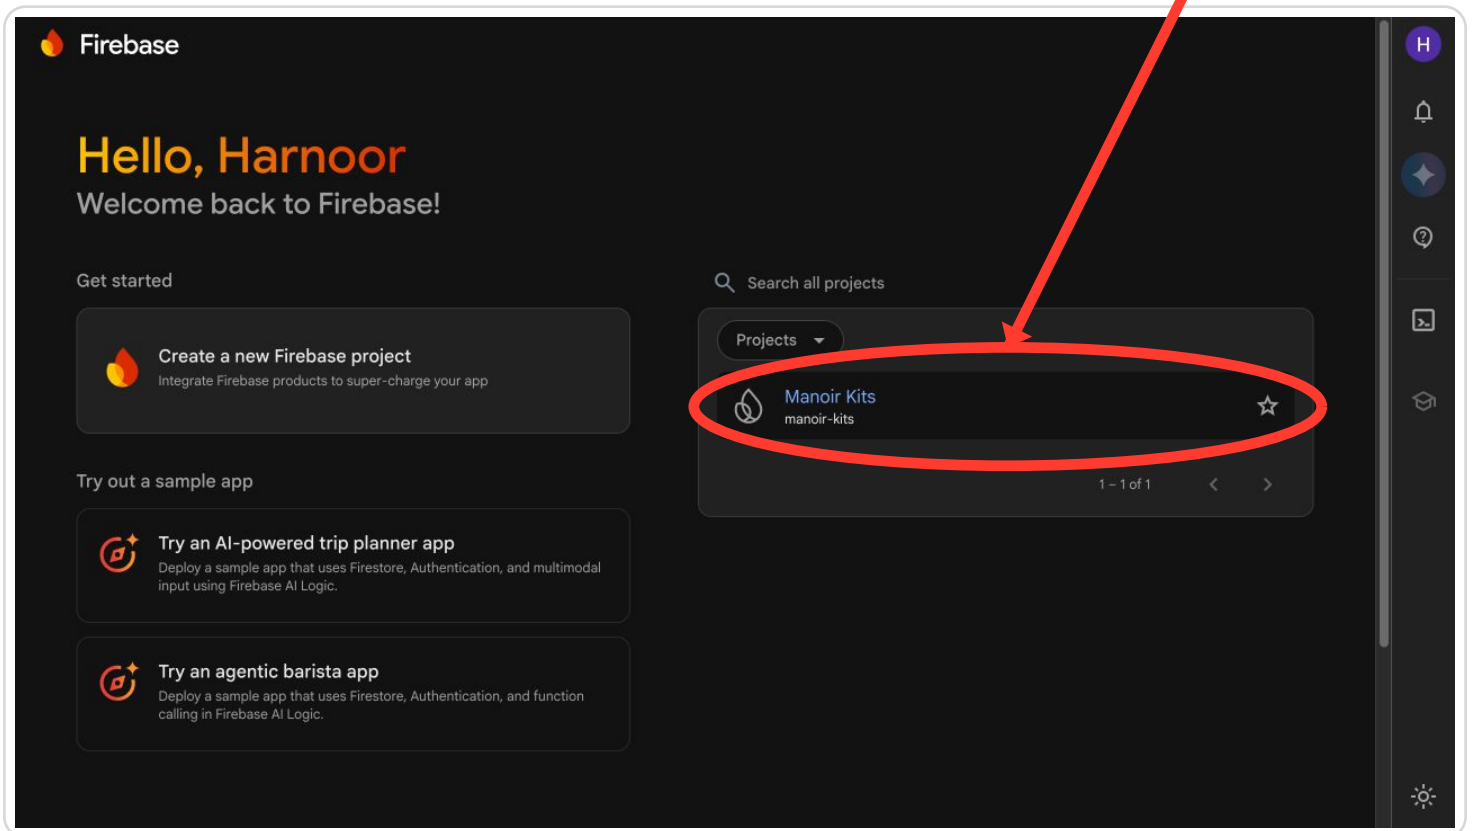

do not send your card information to anyone

1

click manoir kits

this is the only project on the account

click this

then

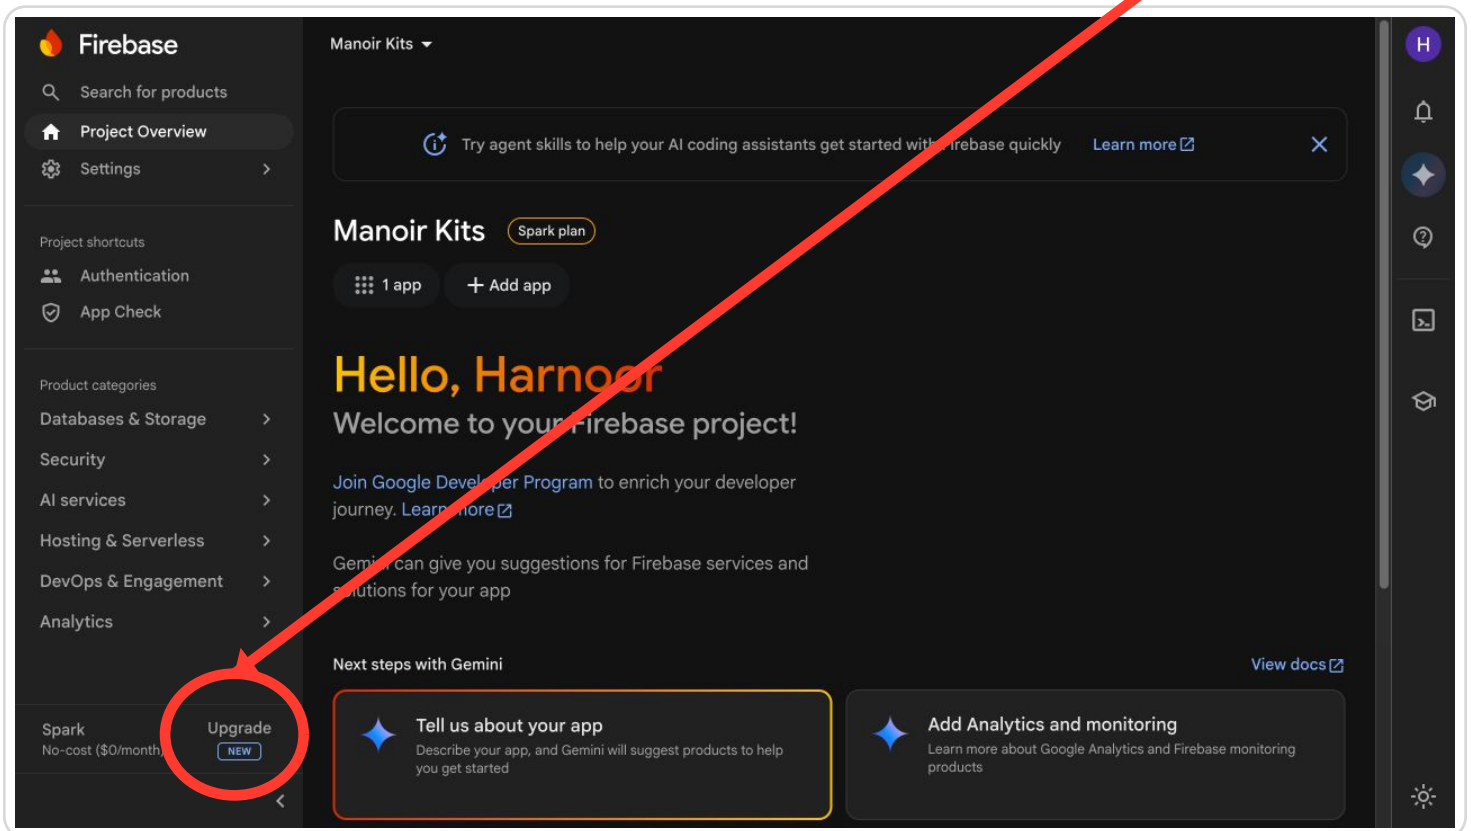

wait for the manoir kits project page to open

2

click upgrade

it is at the bottom left of the screen

click this

then

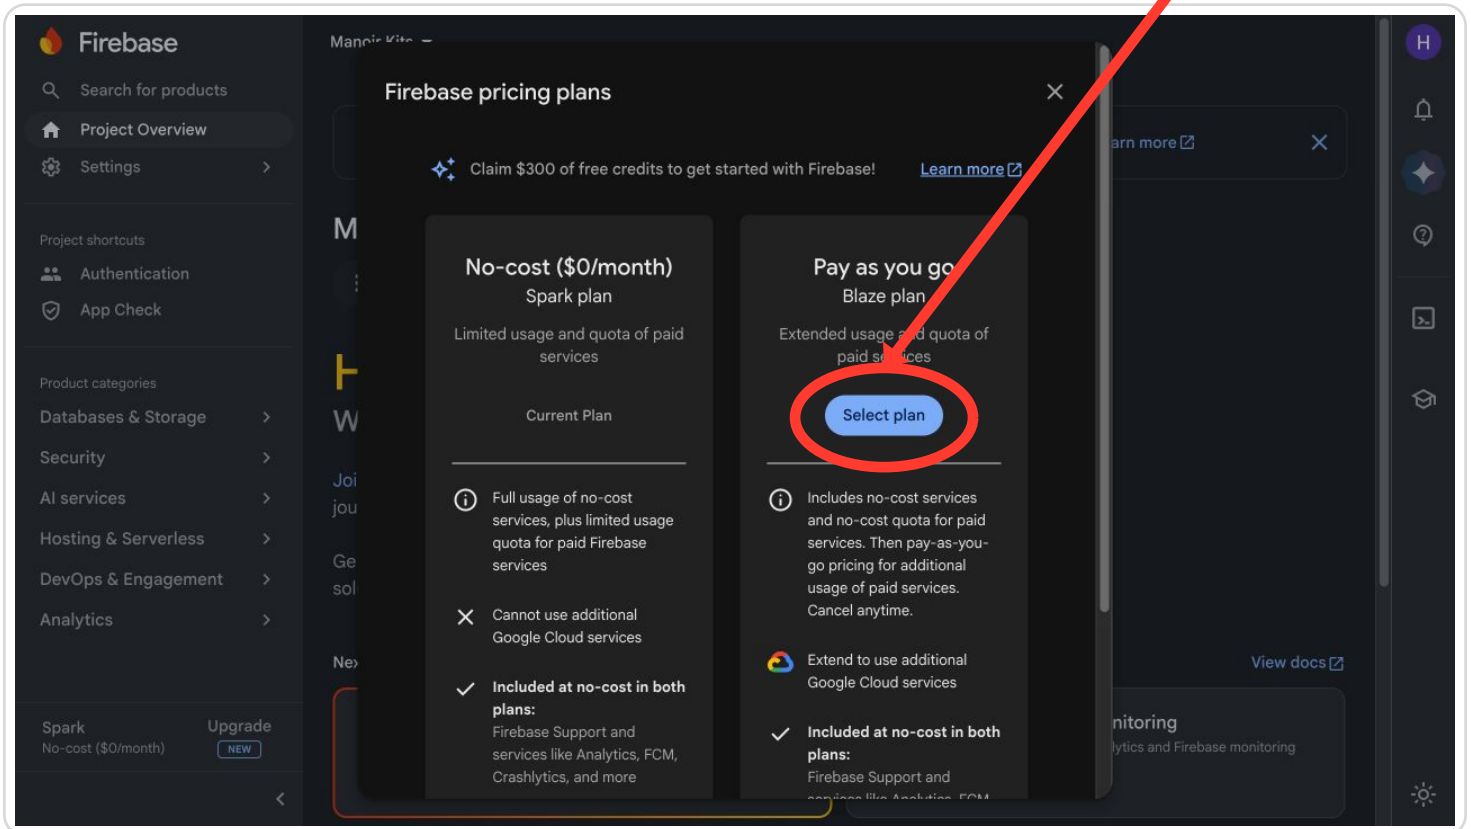

a window with spark and blaze will open

3

choose blaze

click select plan under pay as you go

click this

then

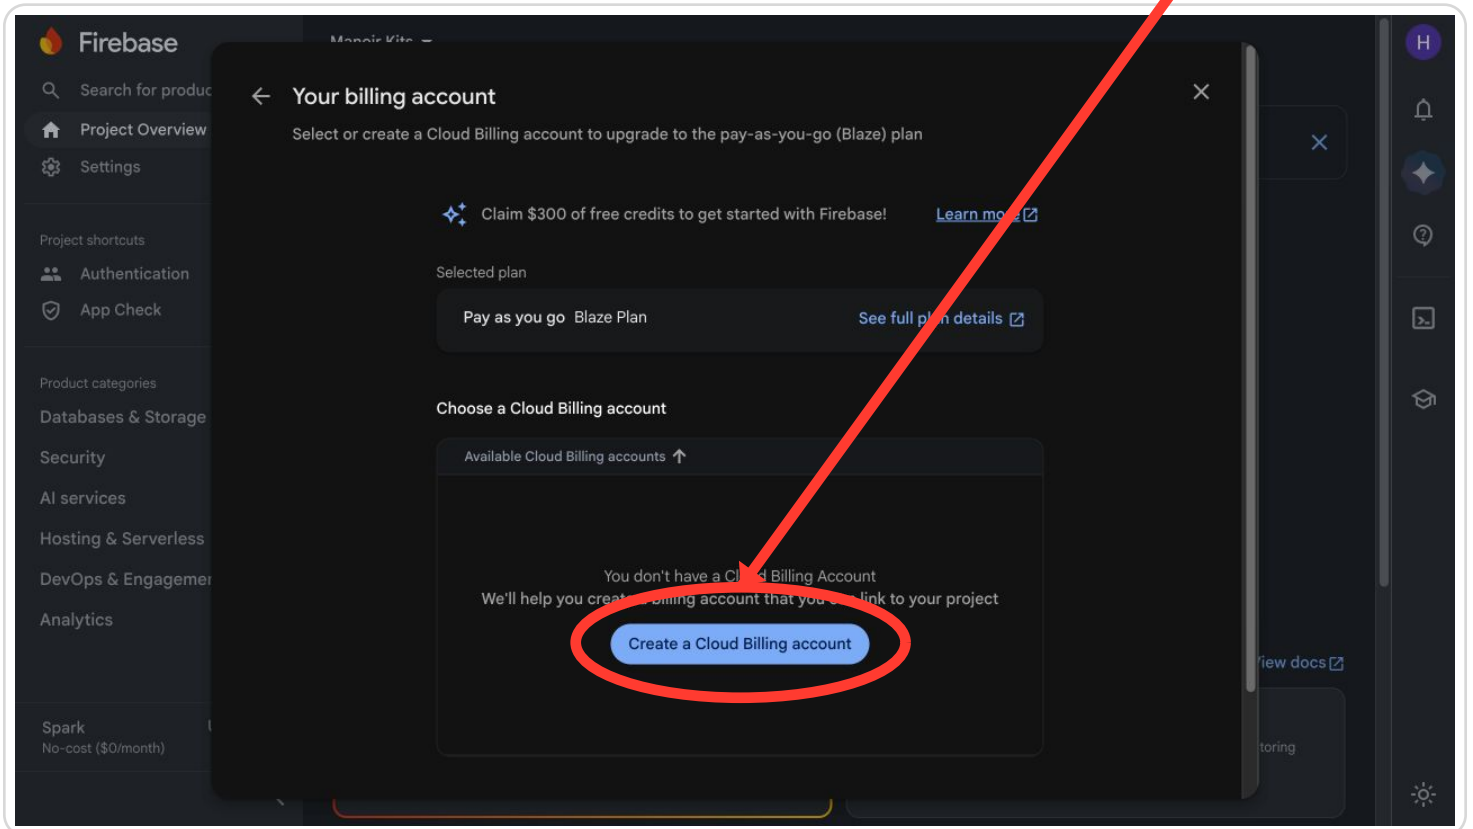

the billing account screen will open

4

create the billing account

click the blue button in the middle

click this

then

google will ask for the billing and card information

5

enter the billing information

this part is private

google will ask for

- ok country
- ok account type
- ok name and address
- ok card information

finish the google form

when firebase says blaze plan send ashwin done

important

do not text or screenshot the card information
